PROFESSIONAL SUMMARY

Profile: Full Stack Developer with a degree in Computer Science and over 5 years of experience in the complete software development lifecycle. Specialized in creating scalable web applications with PHP/Laravel, Python/Django, and React.

Experience: I work in DevOps environments using Docker, Kubernetes, and CI/CD pipelines with GitHub Actions. My experience in the industrial sector strengthened my adaptability and practical problem-solving skills, reaffirming my aptitude for technology. I seek opportunities to apply my technical skills to challenging projects, contributing with a dedicated and quick-learning approach.

PROFESSIONAL EXPERIENCE

TODoca, C.A. – Caracas, VE - Junior Developer Analyst | Jan 2018 – May 2020
- Integration of third-party APIs for payment and authentication services.
- Successful migration from a physical server to a Linux-based VPS infrastructure, resulting in increased system reliability and performance.
- Performing technical support, corrective maintenance for bugs, and ensuring high availability of the platform.

CVG Alcasa – Puerto Ordaz, VE
Project Analyst | May 2012 – Nov 2018
- Responsibilities include gathering requirements, defining processes, and executing corporate projects.
- Conducting technical feasibility analyses and resource allocation.
- Monitoring schedules and providing support in integrated project management.

Raw Materials Analyst | May 2011 – Apr 2012
- Managing requests, controlling inventory, and monitoring the receipt of raw materials.
- Developing utilization analyses and consumption projections to optimize resource availability.
- **Experience in Brazil - Industrial Sector**
  This experience reinforced skills in practical problem-solving, working under pressure, and adaptability in a dynamic environment.

FRANKLIN ELECTRIC – Araquari, SC - Production Assistant I | 02/2025 – Present
- Experience in the areas of molding, sand preparation, and finishing.

- Operation of equipment for handling loads (manual and electric hoists) and use of electric hoists.

TUPY S/A – Joinville, SC - Grinder | 02/2023 – 03/2025
- Work in the quality/finishing sector, performing inspection and finishing of parts.
- Operating a pneumatic hoist and handling various tools.

TECHNICAL SKILLS

Development & Frameworks:
- Back-end: PHP (Laravel), Python (Django)
- Front-end: JavaScript (React)
- Integration of RESTful and third-party APIs

DevOps & Infrastructure:
- Containerization and Orchestration: Docker & Kubernetes
- CI/CD: Implementing pipelines with GitHub Actions
- Server administration, migration, configuration and management of Linux VPS, including performance monitoring and implementation of security measures such as firewalls. Proactive maintenance, technical support and bug fixing in a production environment.

Experience in an Industrial Environment:
- Operation of pneumatic and electric hoists and handling of loads.
- Visual inspection and quality control of parts.
- Molding, finishing, and support processes in production lines.

EDUCATION

- Bachelor's Degree in Computer Science |**Bolivarian University of Venezuela** | 2005 – 2008
- Completed High School |**Validated by the Department of Education of Santa Catarina.** | 2024
- Computer Science Course | In progress |**CEDUP Dário Geraldo Salles Professional Education Center – Joinville/SC**

LANGUAGES

- Spanish: Native
- Portuguese: Advanced (Fluent)
- English: Technical (Advanced reading and writing for technical documentation)
