CV — Migbert Yanez — Full Stack Developer

*Location:** Joinville, Santa Catarina, Brazil*

*Phone:** +55 47 99747-0887*

*Email:** migbertyanez@email.com*

*GitHub:** github.com/migbert*

*Upwork:** Próximamente*

*Languages:** Spanish (Native), Portuguese (Fluent), English (Technical — advanced reading/writing)*

Professional Summary

Full Stack Developer with a Computer Science degree and 5+ years of experience in the complete software development lifecycle. Specialized in building scalable web applications, real-time dashboards, automation systems, and IoT solutions. Proven ability to deliver end-to-end projects: from database schema design and REST API development to React frontends and Docker-based deployments.

Combines strong technical foundations (Python, JavaScript, PHP) with DevOps practices (Docker, CI/CD, Linux administration) and embedded systems experience (ESP32). Focused on creating reliable, maintainable software that solves real business problems.

Technical Skills

Core Stack

DevOps & Infrastructure

- Containerization: Docker, Docker Compose
- CI/CD: GitHub Actions — automated testing, building, and zero-downtime deployments
- Servers: Linux administration (Ubuntu Server), VPS migration and configuration, Nginx, firewall security
- Version Control: Git, GitHub, branching strategies (Git Flow)

Specialized Skills

- Real-time applications: WebSockets, Socket.io
- IoT / Embedded: ESP32-C3, ESP-IDF, MQTT, sensor integration, ST7789 displays, WS2812B LEDs
- REST API design & integration — third-party APIs, authentication (JWT)
- Authentication & security: JWT, session management, secure API design

Methodologies

- Agile / Scrum
- Test-driven development
- Git Flow / feature branching
- Documentation-driven development

Featured Projects

WorkApp — Project Management SaaS

Express.js, React, SQLite, JWT, jsPDF

- Built a complete project management platform with kanban boards, client management, budget tracking with line items, invoice generation (PDF with corporate branding), activity logging, analytics dashboard, and drag-and-drop file uploads
- Implemented JWT authentication with role-based access
- Responsive design optimized for 768px+ screens
- 18 pull requests merged into production with clean architecture

DeskMate — IoT Environmental Dashboard

ESP32-C3, Python, React, WebSocket, MQTT, ST7789, WS2812B

- Developed an IoT environmental monitoring system combining embedded firmware (ESP-IDF + FreeRTOS) with a real-time web dashboard
- Bi-directional WebSocket communication between hardware and browser
- Smart control panel with LED ring visual indicators
- Optimized firmware for low power consumption on constrained hardware

DevOps Pipeline Automation

Docker, GitHub Actions, Linux, VPS

- Designed CI/CD pipelines for multiple web applications
- Automated testing, container building, and zero-downtime deployments
- Infrastructure-as-code using Docker Compose for reproducible environments
- Reduced deployment downtime to near-zero

Professional Experience

Full Stack Developer — Freelance

2024 - Present | Remote

- End-to-end development of web applications and automation systems
- IoT system design and implementation with ESP32 and web dashboard integration
- DevOps consulting: containerization, CI/CD pipeline setup, server migration
- Technology stack: React, Node.js, Python, Docker, Linux

Junior Developer Analyst | TODoca, C.A.

Jan 2018 - May 2020 | Caracas, Venezuela

- Led successful migration from physical server to VPS Linux infrastructure — improved system reliability by ~40% and reduced maintenance overhead
- Provided technical support, bug fixing, and ensured high availability of the production platform
- Maintained and optimized legacy codebase while implementing new features

Project Analyst | CVG Alcasa

May 2012 - Nov 2018 | Puerto Ordaz, Venezuela

- Requirements gathering, process definition, and corporate project execution
- Technical feasibility analysis and resource allocation planning
- Schedule tracking and integrated project management support

Education

Degree Institution Year

****Computer Science**** (Graduação) Universidad Bolivariana de Venezuela 2005 – 2008

****High School Diploma**** (Validated) Secretaria de Educação de SC, Brazil 2024

****IT Professional Course**** (In progress) CEDUP Dário Geraldo Salles — Joinville/SC 2025 – Present

Certifications & Ongoing Learning

- Linux Server Administration — self-taught, 5+ years hands-on
- Docker & Containerization — production experience
- ESP32 / Embedded Systems — project-based learning
- English for Technical Documentation — advanced reading and writing

Key Strengths

- Full ownership: I handle projects from concept to production — architecture, coding, testing, deployment, and documentation
- Bilingual advantage: Can work with LATAM clients (Spanish/Portuguese) and US/EU clients (English)
- Fast learner: Self-taught in multiple technologies with proven ability to deliver in unfamiliar stacks
- Communication: Daily updates, transparent progress tracking, and clear documentation as part of my workflow
