MIGBERT YÁNEZ CANA

Full Stack & DevOps Software Engineer | High-Reliability Solutions

Joinville, SC, Brazil | (+55 47) 99293-8774 | migbert.yanez@gmail.com | linkedin.com/in/migbert-yanez-cana | migbertweb.xyz | github.com/migbertweb

EXECUTIVE SUMMARY (ANTI-RISK PITCH): Computer Scientist and Full Stack Software Engineer with over 5 years of experience designing web architectures and cloud infrastructures focused on **eliminating single points of failure, preventing system downtime, and mitigating operational waste**. Specialized in PHP (Laravel), Python (Django), React, and DevOps practices (Docker/Kubernetes, CI/CD). Proven track record delivering high-availability applications with zero-downtime, safeguarding companies against hidden refactoring costs and production vulnerabilities.

PROFESSIONAL EXPERIENCE

Full Stack Developer & DevOps Consultant (Freelance)

2024 – Present

- **Eliminated production downtime risks and revenue loss**, achieving **100% zero-downtime deployment stability** and fully reproducible environments by architecting automated CI/CD pipelines (GitHub Actions, Docker Compose, Dokploy) on Linux VPS servers.
- **Prevented operational leaks and financial flaws in the WorkApp SaaS platform**, ensuring **100% data integrity across invoicing and Kanban management over 18 critical PRs** (Express.js, React, SQLite, JWT).
- **Mitigated critical data loss risks in IoT environmental monitoring (DeskMate)**, reducing **response latency to milliseconds** via C/C++ ESP32 firmware (ESP-IDF) integrated with real-time WebSocket and MQTT React dashboards.

TODoca, C.A. — Jr. Software Analyst & Developer

Jan 2018 – May 2020

- **Eliminated recurring physical hardware costs and unplanned outages**, achieving a **~40% system reliability gain** by leading the planned migration of legacy servers to dedicated Linux VPS infrastructure.
- **Protected against payment vulnerabilities and authentication failures**, ensuring **zero transaction friction and high platform availability** through rigorous 3rd-party RESTful API integrations and proactive exception handling.

CVG Alcasa — Project & Operations Analyst

May 2012 – Nov 2018

- **Safeguarded corporate projects against budget overruns and schedule delays**, ensuring **optimized resource allocation and eliminating supply chain bottlenecks** through technical feasibility analysis and predictive modeling.

OTHER PROFESSIONAL ADAPTABILITY EXPERIENCE

- **Temporary Industrial Experience (Joinville/SC | 2023 – 2026):** Operational roles (TP-Link, Franklin Electric, Tupy S/A). *Demonstrates strong execution under pressure, discipline, and adaptability in Brazil while continuously advancing software engineering projects.*

TECHNICAL SKILLS & TECHNOLOGIES

Backend:	PHP (Laravel), Python (Django), Node.js (Express.js), RESTful APIs, JWT, Clean Architecture
Frontend:	JavaScript, TypeScript, React, HTML5/CSS3, Tailwind CSS, Real-Time Dashboards
DevOps & Cloud:	Docker, Kubernetes (K8s), CI/CD (GitHub Actions), Linux VPS, Dokploy, Nginx, Shell Scripting
Databases & IoT:	PostgreSQL, MySQL, SQLite, Redis, ESP32 (ESP-IDF, C/C++), MQTT, WebSocket

EDUCATION & CERTIFICATIONS

- **B.S. in Computer Science** — Universidad Bolivariana de Venezuela (2005 – 2008)
- **Technical Specializations:** Software Architecture, Containerization & Orchestration (Docker & Kubernetes), Advanced CI/CD, LLM Integration.
- **Languages:** Spanish (Native), Portuguese (Fluent/Advanced), English (Advanced Technical).
